

White Post Lakes

Gillingham & District Angling Association

White Post Lakes, Todber, Dorset, DT10 1JB

Two fresh water lakes situated on the outskirts of Gillingham, within the infamous Todber Manor Fisheries Complex, with ample hard surface parking, disabled access and a wide selection of course fish.

W Situated on the outskirts of Gillingham in Dorset, Whitepost Lakes fishery is easy to find and has good access.

h Whitepost Lakes offers two lakes packed with a large head of mirror and common carp up to double figures.

i **M**an made but now beautifully matured, both lakes are similar in design with lots of overhanging trees, lily pads, reeds, varying depths and both offering a wide selection of course fish which frequently produces bags of carp over 100lbs.

e Various methods work here from paste fishing, pellet waggler, method feeder and pellet fishing on the pole both up in the water and at full depth.

P Some of the pegs can be reached with 16m poles offering an ideal attack for the pole angler but some pegs are much wider requiring a slightly different approach with a running line.

O A variety of baits work here from pellets, corn, meat, paste, maggot, caster and worm, but you will need to fish bigger baits to avoid the smaller fish. The carp here average around 4lb on both lakes here, so gear up accordingly and expect a great days sport on any peg.

The far bank is a good starting area, but don't ignore the near margins, these can be very productive if you feed them for few hours, giving the fish a bit of time to settle and then go in over the top.

Directions:

From Gillingham, follow signs for East Stour and Sturminster Newton. Go over the railway bridge and turn right into New Road.

Follow the road through to East Stour, go straight over the cross roads, once you have passed through Stour Provost you go down a slight hill with a large house on the right hand side, turn right here and the lakes are 100 meters down the road on your left.
